

## REMARKS

The Office Action of August 11, 2006 has been received and considered. Claims 1-33 are pending in the application. Claims 13 and 23 have been amended. Claims 1-5 and 7-21 are allowed. Claims 6, 22, 23, 27, 28, 32 and 33 are rejected under 35 U.S.C. §102(b) as being anticipated by U.S. Patent No. 6,112,370 to Blanchard et al. ("Blanchard"). Claim 31 is rejected under 35 U.S.C. §103(a) as being unpatentable over Blanchard in view of U.S. Patent No. 6,003,945 to Kojima ("Kojima"). Claims 23-26, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Each of the Examiner's rejections is discussed below.

### Claim Objections

Claims 13 and 23 have been objected to on the grounds of various informalities. Claims 13 and 23 have been amended in non-limiting fashion, as suggested by the Examiner, and are now believed to be in proper form. An indication to that effect is respectfully requested at this time.

### Section 102

Claims 6, 22, 23, 27, 28, 32 and 33 are rejected under 35 U.S.C. §102(b) as being anticipated by Blanchard. The rejection is respectfully traversed.

Blanchard discloses a seat assembly having a fixed connecting flange 24 and a mobile connecting flange 26. Four coupling levers 34A, B, C, D with toothed sectors engage a toothed sector 48 on a shoulder 50 of mobile flange 26.

Blanchard fails to disclose or make obvious a reclining vehicle seat hinge assembly having a first housing secured to a seat pan, a pair of primary pawls **slidable radially** with respect to the first housing and a pair of secondary pawls **slidable radially** with respect to the first housing, as required

by independent claim 6.

The coupling levers 34a-d of Blanchard do not slide radially with respect to fixed flange 24 or mobile flange 26. Fixed flange 24 and mobile flange 26 have a common axis X. Coupling levers 34a-d pivot about a pivot axis that is offset from, and parallel to, axis X. Specifically, at column 4, lines 30-35, Blanchard recites that a first end 36A of coupling levers 34a, b has a pivot P mounted to pivot in a pivot slot L. "The pin P and the slot L define a pivot axis of the coupling lever substantially parallel to the rotation axis X." Coupling levers 34a-d simply **do not slide radially** with respect to a first housing.

Accordingly, the rejection is improper and should be withdrawn.

### **Section 103**

Claim 31 has been rejected under 35 U.S.C. § 103(a) over Blanchard in view of U.S. Patent No. 6,003,945 to Kojima. Kojima is recited as disclosing a cooperating washer. This rejection is respectfully traversed.

Kojima fails to overcome the deficiencies of Blanchard discussed above. Specifically, Kojima fails to disclose or make obvious a reclining vehicle seat hinge assembly having a first housing secured to a seat pan, a pair of primary pawls slidable radially with respect to the first housing and a pair of secondary pawls slidable radially with respect to the first housing, as required by independent claim 6, from which claim 31 depends.

Accordingly, the rejection is improper and should be withdrawn.

**Allowable Claims**

Applicants thank the Examiner for the indication that claims 1-5 and 7-21 are in condition for allowance.

Claims 24-26, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Since claim 6, from which claims 24-26, 29 and 30 depend, is believed to be allowable, as discussed above, claims 24-26, 29 and 30 are believed to be allowable in their present form. Accordingly, the objection should be withdrawn.

**Conclusion**

Pending claims 1-33 are believed to be in form for allowance, and an indication to that effect is respectfully requested at this time. Please apply any charges or credits to Deposit Account No. 19-0733.

Respectfully submitted,

Dated: November 7, 2006
